## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sheridan Snedden on August 19, 2010.

2. The application has been amended as follows:

In the claims:

In claim 105 the phrase "alone or conjugated" has been replaced with "wherein the antibody is optionally conjugated".

Claims 109-115 are canceled.

3. The following is an examiner's statement of reasons for allowance:

The primary motivation to treat rheumatoid arthritis by substituting a depleting anti-CD69 antibody for a depleting anti-CD4 antibody was that the depleting anti-CD69 antibody addressed the short-comings of the prior art depleting anti-CD4 antibodies. In particular, as stated in the most recent Office Action, "unlike a depleting anti-CD4 or anti-CDw52 antibody whose activity is instantly diluted by binding to all of the peripheral blood CD4+ T cells which do not contribute to disease pathogenesis (see, e.g., Choy at page 488, left col., 1<sup>st</sup> paragraph through col. bridging paragraph), *a depleting anti-CD69 would be exceptionally specific for the T cells found at the site of rheumatoid arthritis pathogenesis.* For this reason one of ordinary skill in the art would have a reasonable expectation of being able to administer a depleting anti-CD69 antibody at a dose that could effectively deplete the T-cell found in the synovial joint of a rheumatoid arthritis patient." (see Non-final mailed December 1, 2009 at page 5-6 bridging paragraph, emphasis in the original).

However, the appeal brief filed March 16, 2010 described how Marzio teaches that CD69 has a "wide cellular distribution" and that it is "constitutively expressed by monocytes, platelets, CD3<sup>bright</sup> thymocytes, and some peripheral lymphocyte populations." (see page 10, 2<sup>nd</sup> paragraph). Notably, this is not an isolated teaching, for example Ziegler teaches the same broad cellular distribution for CD69 (see, Stem Cells. 1994 Sep;12(5):456-65, especially pages 457-58).

Given that the skilled artisan believed that they would be unable to administer depleting anti-CD4 antibodies at high enough doses to achieve significant concentration in the rheumatoid joint (see the teachings of Choy 1998 at page 488, column bridging paragraph) they would be

Art Unit: 1644

even more uncertain about their ability to do so with depleting anti-CD69 antibodies given the wide cellular distribution of this marker.

For example, while CD4 is expressed on a subset of T cells and NK cells, it is not expressed by other cells; in contrast, not only is CD69 expressed by T cells found in the rheumatoid synovium, it is also constitutively expressed by, e.g., platelets which outnumber *total* CD4 T cells by 600:1 (see, e.g., Blood Work: a complete Guide for Monitoring HIV, project inform, May 2007, pp 1-12, see page 3).

Thus, the claimed invention is non-obvious because the teachings of Marzio and Ziegler nullify the primary motivation that one of ordinary skill in the art would have to treat rheumatoid arthritis by substituting a depleting anti-CD69 for a depleting anti-CD4 antibody.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Claims 56, 59, 60 and 105-108 are allowed.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ZACHARY SKELDING whose telephone number is (571)272-9033. The examiner can normally be reached on Monday - Friday 8:00 a.m. - 5:00 p.m.
